Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I – Claims 1-5, 18-27 are directed to recognizing patterns using one lead frame indexing step and a die orientation step of setting die eye boxes and die eye points on two specific areas corresponding to embodiment 1 in Fig. 1 of the Applicant's disclosure.

II – Claims 6-9 are directed to recognizing patterns using two lead frame indexing steps corresponding to embodiment 2 in Fig. 2 of the Applicant's disclosure.

III – Claims 10-17, 18-27, 28-33 are directed to recognizing patterns using one lead frame indexing step and a die orientation step of setting die eye boxes and die eye points on a specific pattern corresponding to embodiment 3 in Fig. 3 of the Applicant's disclosure.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 18-27 are generic to the first and third embodiment.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument

that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP §809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

Complete Requirement

3. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

Joint Inventors

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
